

Git Commands

1. `$ git init`
2. `$ git status`
3. `$ git add .` (all files from directory) or `{file name}`
4. `$ git commit -m "This is my first commit 1.txt and 2.txt"`
5. `$ git remote add origin "URL of Git repository"`
6. `$ git push origin master or main {will ask for username and password}`
- 7.

Error

```
$ git commit -m "second modify"$ git commit -m "second modify"
```

*** Please tell me who you are.

Run

```
git config --global user.email "you@example.com"
git config --global user.name "Your Name"
```

to set your account's default identity.

Omit --global to set the identity only in this repository.

fatal: unable to auto-detect email address (got 'testlab@Home-Desktop.(none)')

Solution : -

1. **\$ git config --global user.email ["abulhassan.1923@gmail.com"](mailto:abulhassan.1923@gmail.com)**
2. **\$ git config --local user.email "abulhassan.1923@gmail.com"**
